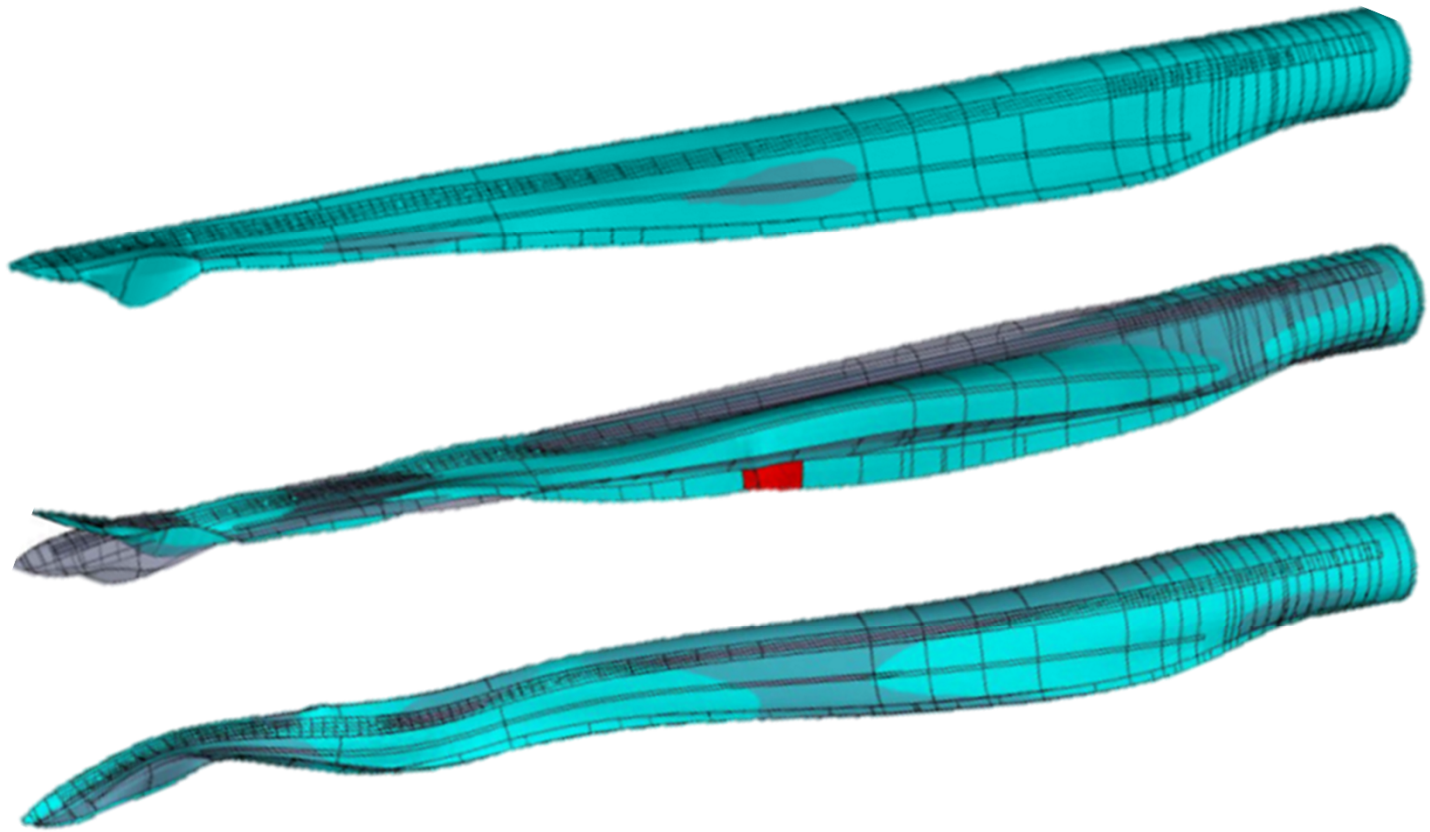
Physical Principle



Rotor blade vibrations give us information about the state of the structure:

- **Damage**
- **Ice**

Structural damages and **ice** change the **natural frequencies**:

- Structural damages reduce the **stiffness**
- Ice increases the rotor blade **mass**

Public Safety

- **Hazard** to people as a result of flying ice chunks must be prevented.
  No ice throw!

- **Regulations** vary per country
- **State of the art** technology with increased security level.
- **Automatic Restart** certified

DNV·GL

TYPE CERTIFICATE

Certificate No.: TC-DNVGL-SE-0439-03577-0
Issued: 2018-01-27
Valid until: 2020-01-26

Issued for:
Ice Detection System
IDD.Blade
Specified in Annex 1

Issued to:
Wölfel Wind Systems GmbH
Max-Planck-Str. 15
97204 Höchberg, Germany

According to:
DNVGL-SE-0439:2016-06 Certification of condition monitoring

Based on the documents:
CR-DNVGL-SE-0439-03577-0 — Certification Report Ice Detection System IDD.Blade, dated 2018-01-27

Changes of the system design, the production or the manufacturer's quality system are to be approved by DNV GL.

Hamburg, 2018-01-27
For DNV GL Renewables Certification
Mike Woebbeking
Service Line Leader Component Certification

DAkkS Deutsche Akkreditierungsstelle D-ZE-11053-01-00
By DAkkS according DIN EN IEC/ISO 17065 accredited Certification Body for products. The accreditation is valid for the fields of certification listed in the certificate.

Hamburg, 2018-01-27
For DNV GL Renewables Certification
Robert Kasch
Senior Project Manager

The accredited certification body is Germanischer Lloyd Industrial Services GmbH, Brooktorkai 18, 20457 Hamburg.
DNV GL Renewables Certification is the trading name of DNV GL's certification business in the renewable energy industry.

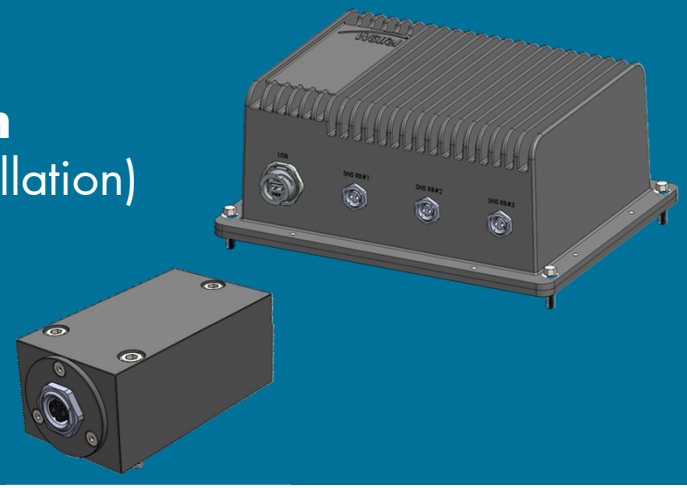
Accurate Ice Detection

Update of hardware platform

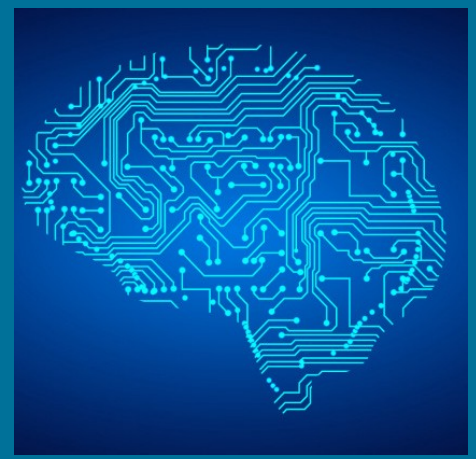
- Cost efficient (production + installation)
- Less space required
- Latest technology inside



Implementation of **Artificial Intelligence**

Machine learning algorithm is updating the accuracy permanently.

Higher Accuracy during longer Operation.

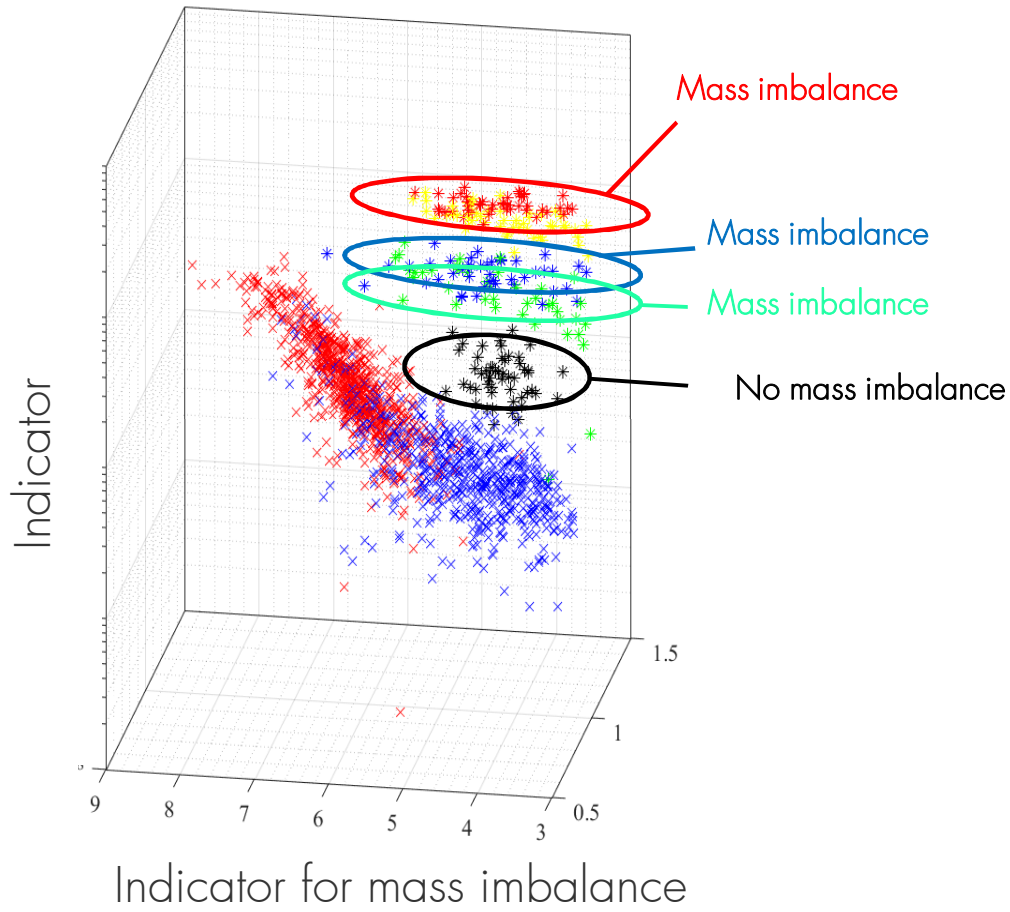


© Wölfel 2019. All rights reserved.

Material Damage

Higher loads and **imbalances** can lead to damages to the structure:

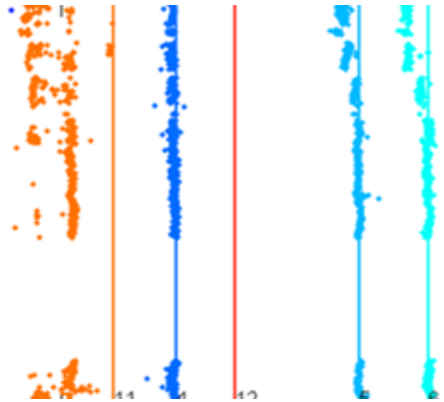
- enormous loss of revenue
- less lifetime for main components

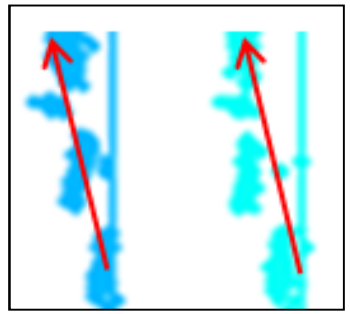


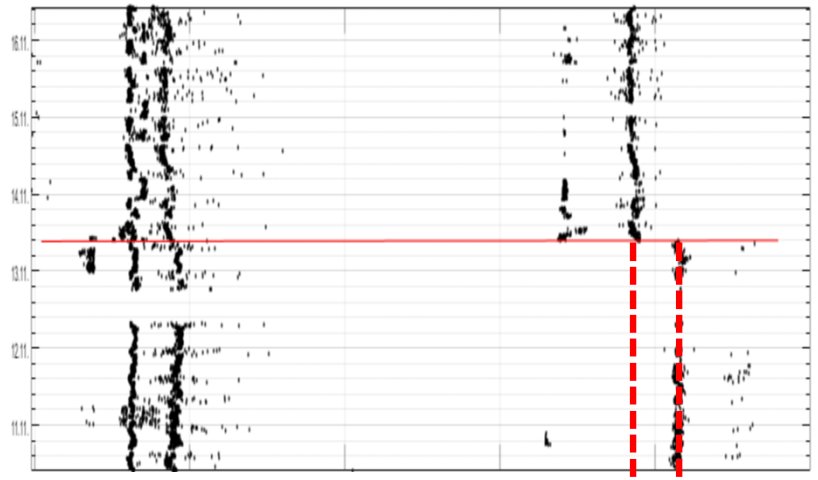
© Wölfel 2019. All rights reserved.

Lifetime control

Rotor blade damage indication by a **frequency shift**

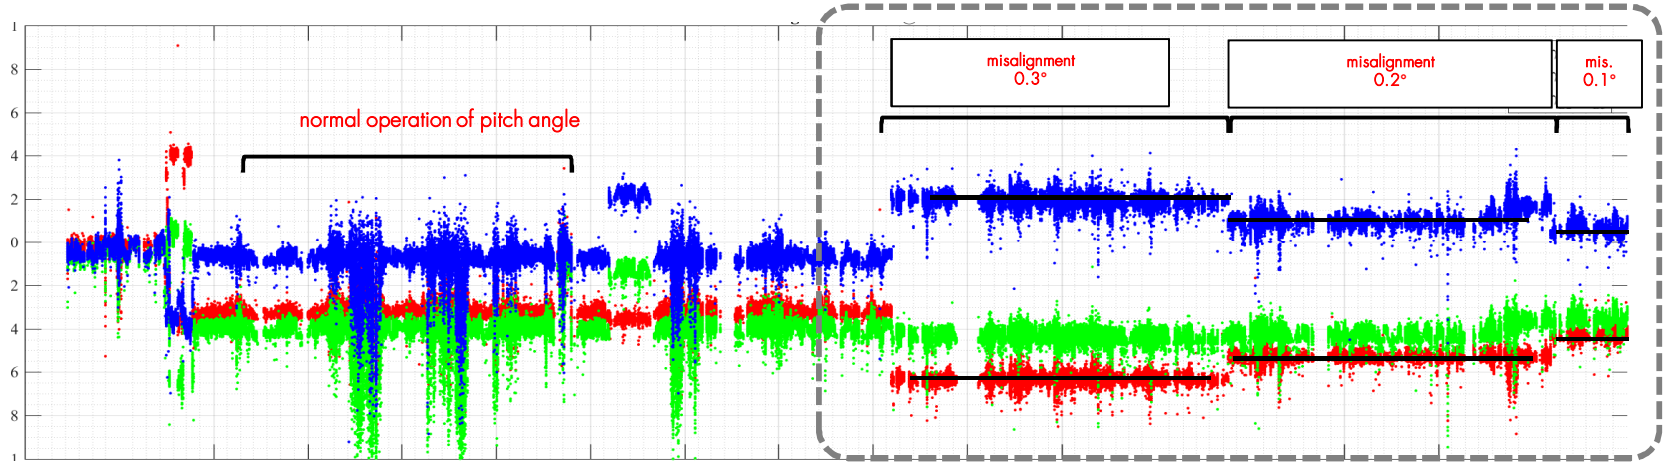


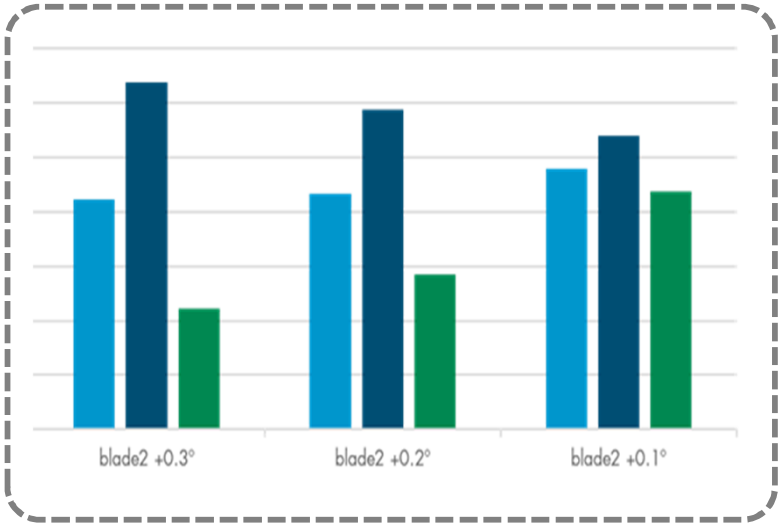




© Wölfel 2019. All rights reserved.

Lifetime control



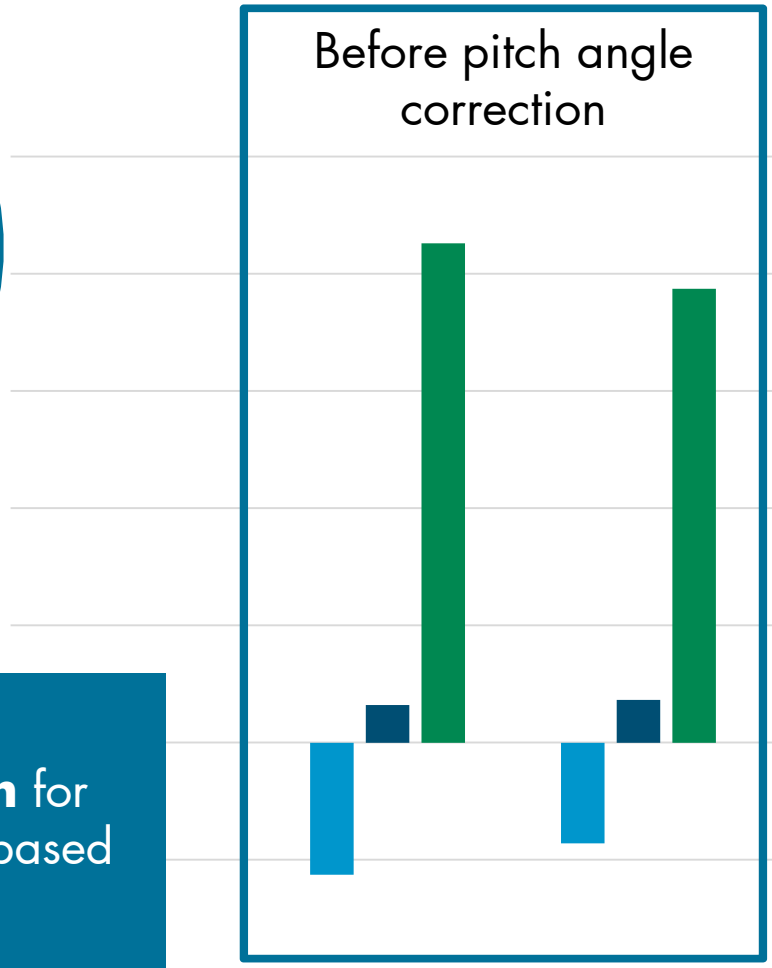


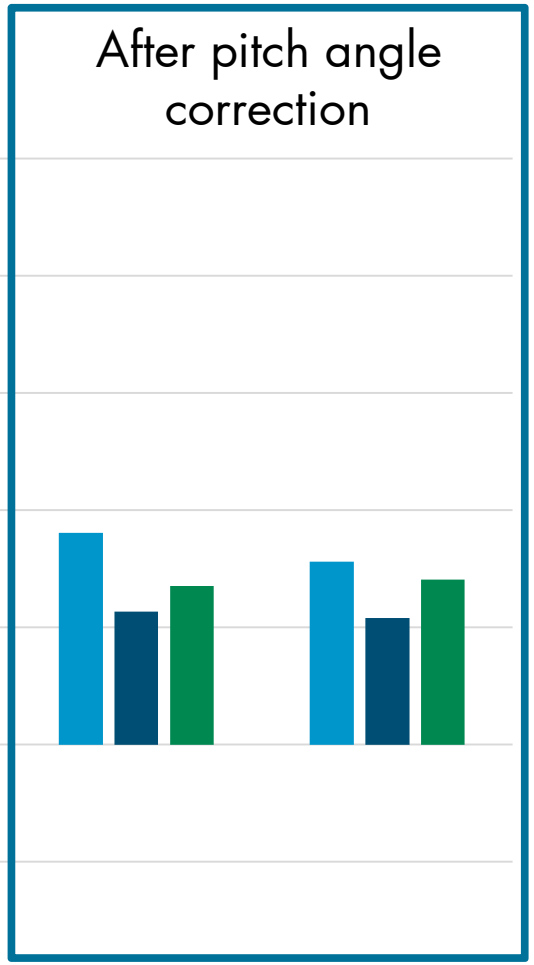
Pitch misalignment leads to different **aerodynamic loading** of the blades

© Wölfel 2019. All rights reserved.

Lifetime control

Passive control algorithm for optimizing of **pitch angles** based on **real loads** of each blade

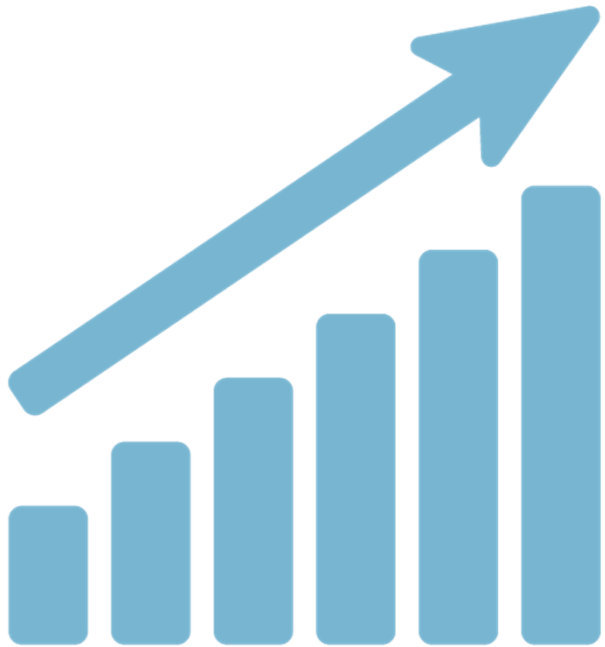




© Wölfel 2019. All rights reserved.

Public Safety

Accurate Ice Detection



Lifetime control

Material Damage
